

Expedited Permit Processing

The Expedited Permit Processing Program allows interested applicants to reimburse LDEQ for overtime costs incurred by employees that work outside of normal business hours to expedite a permit, modification, license, registration, or variance. This program shortens the time between application receipt and a final permit decision.

- Available for air and water permit applications, but not solid or hazardous waste permit applications.
- Other eligibility criteria are set forth in LAC 33:I.1801.B.

Expedited Permit Processing

Importantly, the expedited permit processing program cannot supersede any prescribed public comment periods.

More information, including the 2 page “Request for Expedited Permit Processing” application form, is available on LDEQ’s website at <http://www.deq.louisiana.gov/portal/tabid/2622/Default.aspx>.
